Routing

Arista's Modern Network Operating Model

Consistent Software, Management, and Operations Across All Networks

CloudVision: Multi-Function NetOps Platform

Automated Deployments*

Zero Touch, Pre-provisioning,
Codified Designs, Guided+Custom Workflows

Real-time Telemetry*

Granular state streaming for time-series
continuum for metrics, flows, and events

Change Controls*

Orchestrate hitless network-wide
upgrades, rollback and snapshots

Cognitive Analytics

Agentic engines, correlations, trend
analysis, predictive algorithms across
wired and wireless state, network-wide

SaaS or On-Prem

Compliance / Risk*

Continuously assess, report, and remediate
inventory, deviations, vulnerabilities, bugs

Segmentation Services

Security policy management / enforcement,
Policy / Identity integration, Wireless IPS

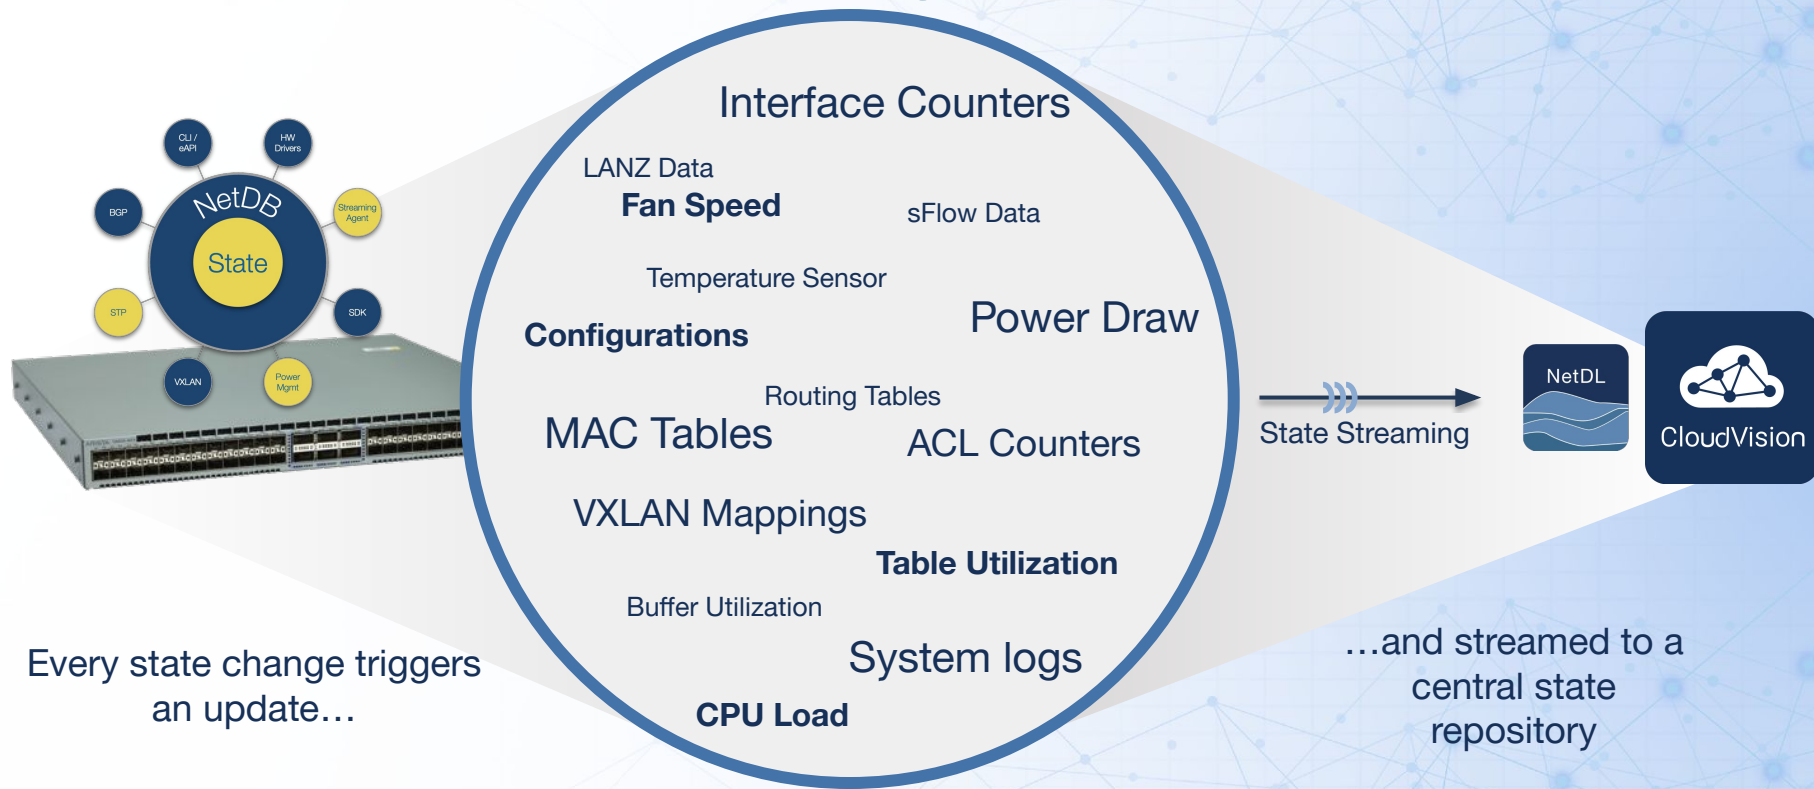

Data Center, Campus Wired/WiFi, Public Cloud, WAN Interconnect

The image features the Arista logo in the top left corner. The background is a light blue gradient with a faint grid pattern. Overlaid on this are two complex network diagrams. One diagram, in a lighter blue, is located in the upper right quadrant, showing a dense web of interconnected nodes and lines. A second, similar diagram in a darker blue is positioned in the lower right quadrant. The overall aesthetic is clean and technical, representing network infrastructure.

ARISTA

Real-Time Telemetry

What is State Streaming?

Every SysDB state change. From every device. Instantaneously.

Real-time Telemetry vs SNMP Polling

- Polling Devices for State on an interval
- Missed state waiting for next poll

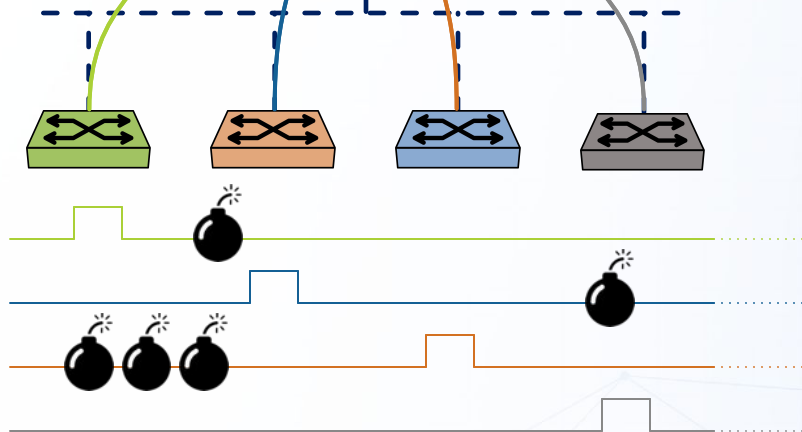

It gets worse when . . .

- More devices/interfaces
- Shorter interval
- More stats requested

'SNMP is Dead' from NANOG 73 back in 2018

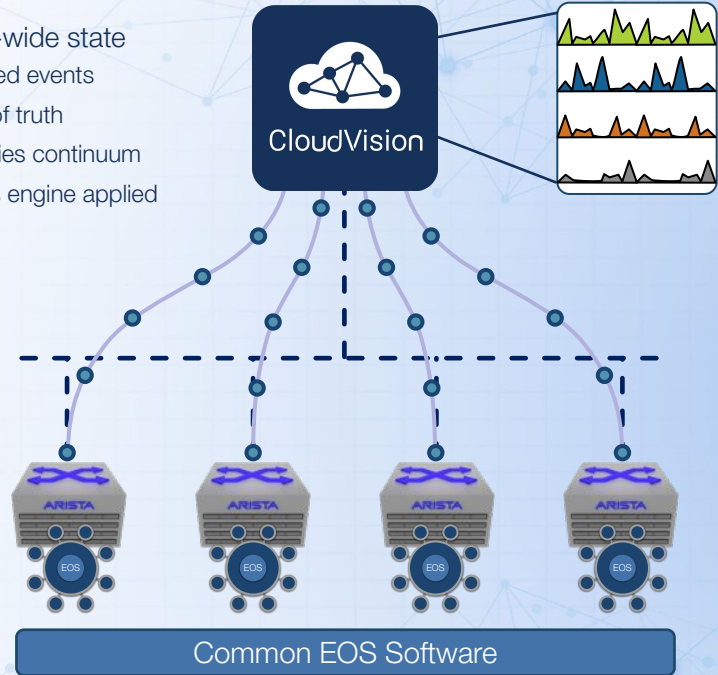

https://www.youtube.com/watch?v=McNm_WfQTHw&t=582s

Era of SNMP

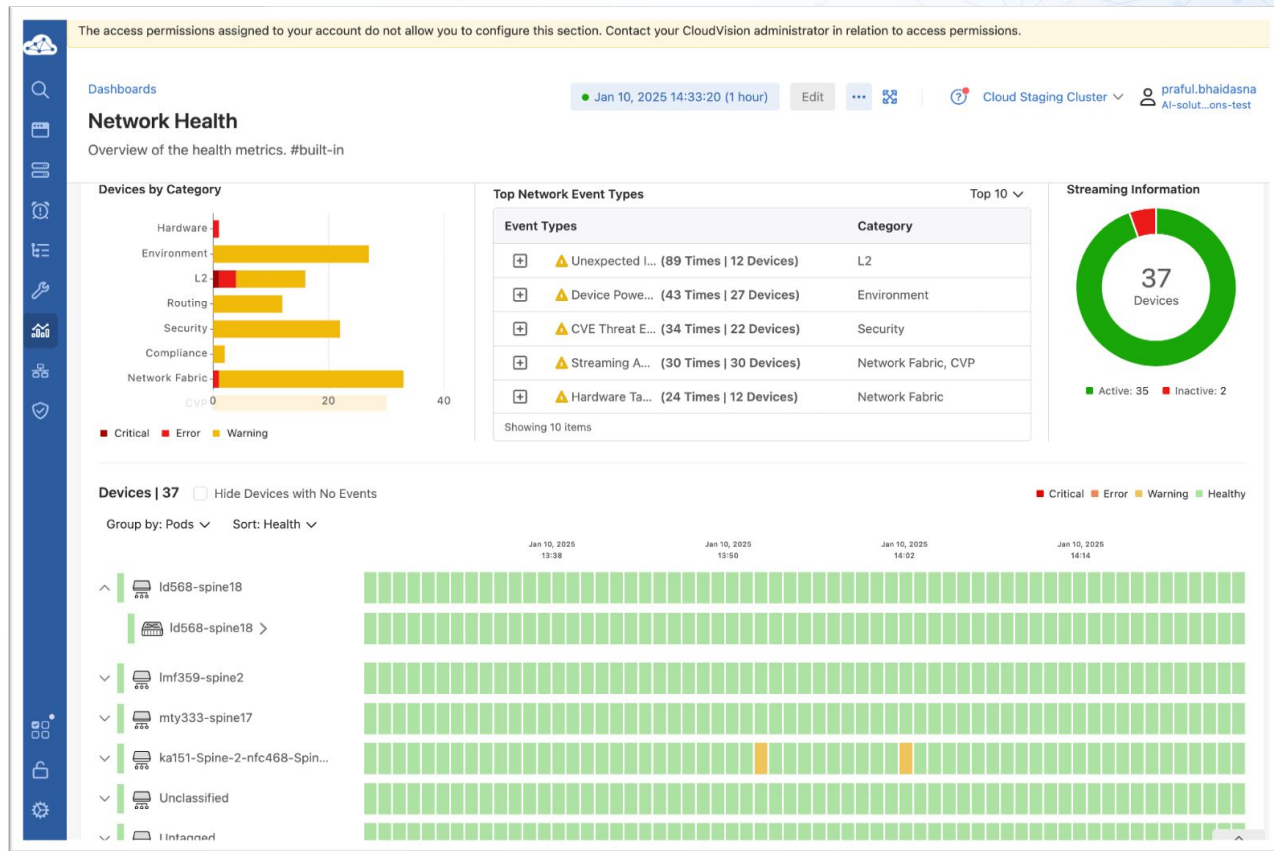

Network-wide state

- No missed events
- Source of truth
- Time series continuum
- Analytics engine applied

Era of State Streaming

CloudVision Dashboards: Network Health

Benefits

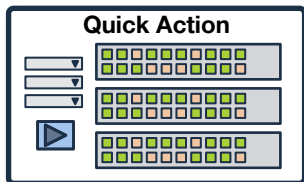

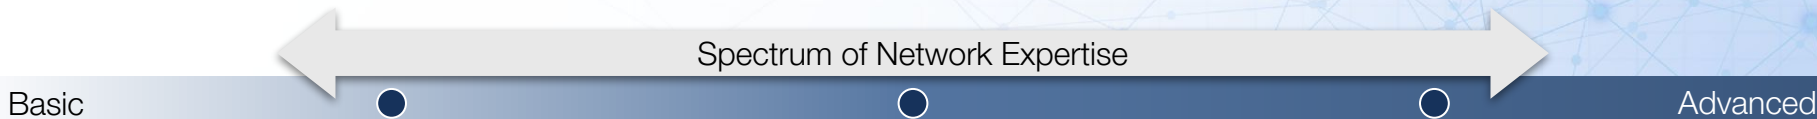

- Accelerates troubleshooting with actionable insights
- Time-based heatmaps provide richer context upfront
- Overcomes limitations of static health scores
- Enables detailed drill-down into network devices, connected servers or flows

The image features the Arista logo in the top left corner. The background is a light blue gradient with a faint grid pattern. Overlaid on this are two complex network diagrams composed of numerous small blue dots connected by thin, light blue lines, forming a web-like structure that spans the top and bottom of the slide.

Extension support

Platform validation

Network Hierarchy

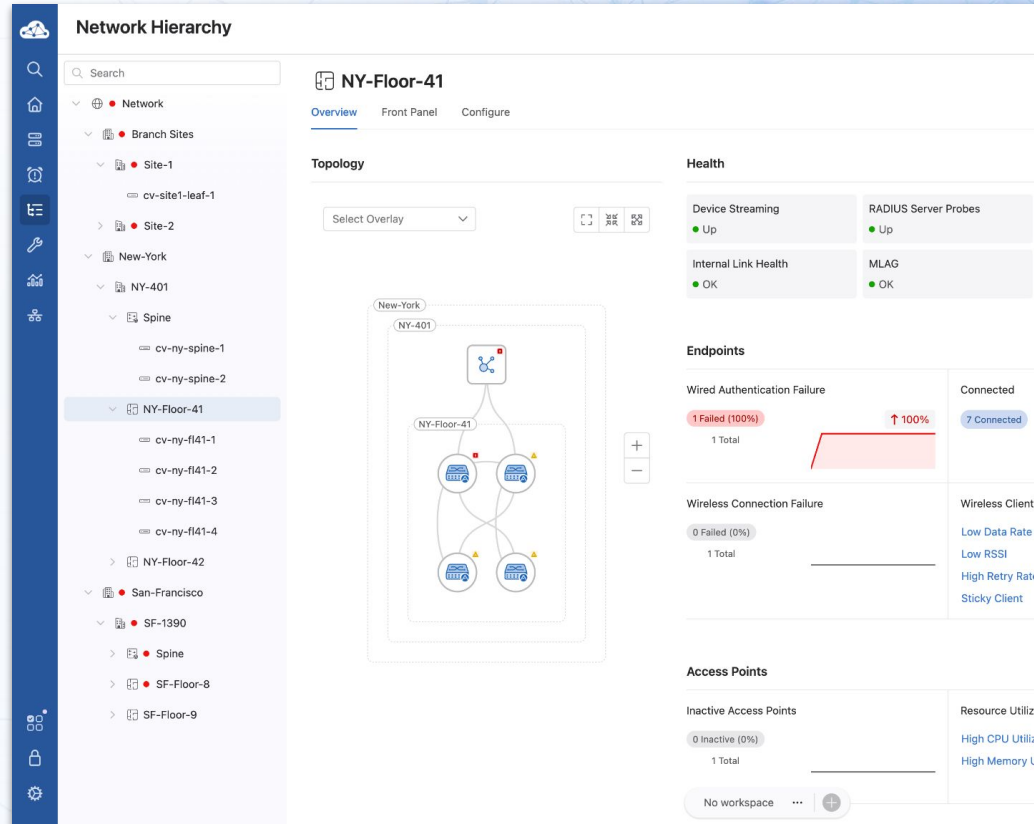

What is it?

- Hierarchical view of the network, designed to be multi-domain (initially supporting campus and branch)
- Bring together telemetry and provisioning into a single area within the product
- Bespoke dashboard views for site types
- Provide front panel views for the user to interact with

Benefits

- Allow the user to see and perform multiple actions within a single page
- Provide launching point into contextual guided workflows
- Quickly understand network health across wired and wireless network

CloudVision Guided Workflows

What is it?

- Provide step-by-step quick actions for the user to follow to complete a task in CloudVision
- Adds an automation layer on top of well-known, built-in CV functions

Benefits

- Improves efficiency and abstracts away complexity of understanding how to achieve common operational tasks
- Apply RBAC to provide simplified workflows to different operator types

Types of workflows

Available Today

Day-0: Define a Campus
Day-1: Deploy Spine and Access Pod
Day-2: Expand an Access Pod
Day-2: Access Interface Configuration
Day-2: Interface Diagnostics (operational/power cycle)
Day-2: Upgrade Access Pod & Spine
Device Replace / Decommission

Planned

Day-0: Define a Branch
Day-1: Deploy Branch
Day-1: Build a SWAG
Day-2: Create Interface Profile
Day-2: Create VLAN/VXLAN
Day-2: Expand an Access Pod (SWAG enabled)
Day-2: Upgrade Campus
Day-2: Upgrade Branch

More to come,
incl. DC

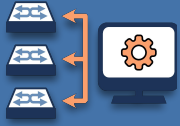

Addressing different operator types, across the multi-domain enterprise

The background of the slide features a complex network of blue lines and dots, resembling a mesh or a molecular structure, set against a light blue gradient. The Arista logo is positioned in the top left corner.

Arista's Modern Network Architecture

The image features the ARISTA logo in the top left corner. The background is a light blue gradient with a subtle grid pattern. Overlaid on this are two complex network diagrams: one in the top right and one in the bottom right. These diagrams consist of numerous small blue dots (nodes) connected by thin blue lines, forming a web-like structure. The overall aesthetic is clean and professional, typical of a corporate presentation.
