A little History

2004

Ken Duda and Andy Bechtolsheim (cofounder of Sun Microsystems) who had been with Granite Systems was acquired by Cisco. This would later become the Catalyst product. Went on to create **Arastra** (later renamed **Arista**)

With the vision of creating a Network OS which was built from the ground up to be highly scalable for the cloud. Customer immediately took notice.

2008

Jayshree Ullal (**Crescendo**) who had been with Cisco for 15 years joins Arista as the CEO. Before leaving Cisco, she was the VP of Data Center & Switching which oversaw the Catalyst & Nexus product lines.

By this time Arista had customers from Financial Institutions, Hyperscalers, Enterprise and Service providers

2014

With all cylinders firing and customers such as Microsoft, Google, Facebook, Netflix, Twitter, eBay and many more Arista went public.

Arista continued to expand their teams but stayed true to a single OS across all platforms. As more features were added the lines between switches and routers blurred as every switch had full features

2026 & Beyond

While continuing to service the Enterprise and Hyperscalers Arista continues to build highly scalable and reliable networks. We have been the #1 provider of DC ports for the last year and are helping customer begin the transformation to 400G and 800G transport, with 1.6 Terabit on the horizon.

Why do people choose Arista?

Ease of use!

If you already know the industry standard CLI then you are good to go. Learn a couple new commands in a day. Nothing proprietary, all open standard.

Single OS

Single OS across all platforms makes it easy to train, manage, upgrade and extend environment to cloud.

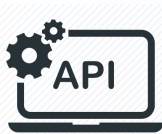

Lower Costs

Lower cost comes from fewer Licensing SKUs. Average Arista quote has 3 or less SKUs (HW/SW/Maint)

Best Support

World-class one call support. Engineer who picks up the call works the case until completion. **77 support depots in EMEA*

Automators Dream

Ranked #1 by customers and advocates as the best network and automation platform on the planet.

Open Standards

Everything is Open Standards Networking, nothing proprietary, works with existing networking infrastructure.

Integration

Our platform integrates with almost all Firewall, Security, Big Data, Automation, NLB, HCI, Storage, etc. Providers.

Workshop Agenda Overview Day 1

10:00 am - 10:15 am - **Intro and Course Overview** - *Presented by: Steven Davis*

- Introduction to the lab environment, tools and lab guides

10:15 am - 10:45 am - **CloudVision Overview** - *Presented by: Allan Olsson*

- What is CloudVision? What does it solve?

10:45 pm - 12:30 pm - **Provisioning/Onboarding w/ Essential Studios** - *Presented by: Patrick Felt*

- Onboarding network devices into CloudVision Essential Studios

12:30 pm - 1:00 pm - **Lunch!**

1:00 pm - 2:30 pm - **Provisioning/Onboarding w/ Advanced Studios** - *Presented by: Patrick Felt*

- Onboarding network devices into CloudVision Advanced Studios

2:30 pm - 4:00 pm - **Network Hierarchy and Guided Workflows** - *Presented by: Steven Davis*

- Onboarding network devices using Network Hierarchy
- Guided workflows

Workshop Agenda Overview Day 2

10:00 am - 12:00 pm - **CloudVision, Common Day 2 tasks** - *Presented by: Nick Moore*

- AskAVA! - CloudVision-native AI tool
- Day 2 administration
 - Network Hierarchy
 - Compliance
 - Software Upgrades
 - Telemetry

12:00 pm - 1:00 pm - **Lunch!**

- CloudVision AI use case demo

1:00 pm - 4:00 pm - **CloudVision Troubleshooting** - *Presented by: Jonathan Smith*

- Discovering and replacing a failed device - ZTR
- Troubleshooting tools:
 - Advanced Tagging and Events
 - Event and Notifications
 - Connectivity Monitor
 - Dashboards
- Prize handout

Lab guides and diagrams

slido

The image features the Arista logo in the top left corner. The background is a light blue gradient with a subtle grid pattern. Overlaid on this are two complex network diagrams: one in the top right and one in the bottom right. These diagrams consist of numerous small blue dots (nodes) connected by thin blue lines, forming a web-like structure. The overall aesthetic is clean and professional, typical of a corporate presentation.
